

Attention K-12 Educators...

Get WILD in Winter!

You may not think of winter as being the perfect time to get outside, but it is! Many wildlife animals are extremely active when it is cold outside and finding their tracks and signs is fun and easy! Join us for a great day of learning about Nebraska winter ecosystems and receive training in Project WILD!

Project WILD is an award-winning program designed to help educators engage their students in nature and learn about Nebraska's natural resources and ecosystems. Project WILD lessons are interdisciplinary and can be incorporated into any subject - math, science, language arts, reading, P.E., and social studies. All activities are aligned to Nebraska State Education Standards.

Workshop Participants will receive:

- the Project WILD and Aquatic WILD Curriculum and Activity Guides.
- supplemental educational resources!
- knowledge & skills to help teach your students about all subjects!
- snacks and refreshments
- amazing activities to get your students outside in winter!

Saturday,
January 7, 2012

9am - 1pm

Pioneers Park
Nature Center
(3201 S Coddington Ave., Lincoln)
