

Growing Up WILD™

Growing Up WILD: Exploring Nature with Young Children is an early childhood education activity guide that builds on children's sense of wonder about nature and invites them to explore the world around them. Through a wide range of activities and experiences, it provides a foundation for developing positive impressions about nature while also building lifelong social and cognitive skills.

Growing Up WILD's activity guide:

- Is for educators of children ages 3-7.
- Features 27 hands-on activities.
- Includes crafts, art projects, music, science, reading and math connections.
- Involves social, emotional, physical, language, and cognitive domains to help foster learning and development in all areas.
- Is correlated to Head Start Domains.

Tuesday, January 10, 2012

6:30-8:30pm

Heartland Family Service

6720 North 30th St., Omaha

Cost: FREE
