

Growing Up WILD™

Growing Up WILD: Exploring Nature with Young Children is an early childhood education activity guide that builds on children's sense of wonder about nature and invites them to explore the world around them. Through a wide range of activities and experiences, it provides a foundation for developing positive impressions about nature while also building lifelong social and cognitive skills.

Growing Up WILD's activity guide:

- Is written for educators of children ages 3-7.
- Features 27 field-tested, hands-on activities.
- Includes crafts, art projects, music, science activities, reading and math connections.
- Involves social, emotional, physical, language, and cognitive domains to help foster learning in all areas.
- Is correlated to the National Association for the Education of Young Children Standards & Head Start Domains.

Saturday, March 17, 2012
9am to noon
Holiday Inn
Convention Center
Kearney, NE
Cost: FREE

Participants will receive:
