

Power of Pollinators Educator Workshop

Hummingbirds, bats, bees, beetles, butterflies, and flies... these hard-working animals help pollinate over 75% of our flowering plants, and nearly 75% of our crops. Often we don't notice as they help pollinate. Yet without them, wildlife would have less food, and we would miss many fruits, vegetables, and nuts...all of which depend on pollinators.

Join the **Nebraska Natural Legacy Project Education Team** as we investigate Nebraska's native pollinators and the resources they provide.

Participants will receive:

- Hands-on experience learning about Nebraska's pollinators
- Ways to incorporate pollinators & planting for pollinators into classroom curriculum while meeting state education standards
- Numerous resources including curriculum guides, field investigation tools, posters, and books.
- Lunch,, snacks, and refreshments.

Thursday, June 14, 2012
9am - 3pm
Lake McConaughy Water
Interpretive Center
Ogallala, Nebraska

To register, contact:
lindsay.rogers@nebraska.gov

Workshop is limited to 25
participants... register today!
